Background and History

Joe Breseman's Background and History:

Joe started his mechanical ability by riding and working on his own mini bikes back when he was 10 years old in 1970 with a new Honda 50 Mini Trail. He wanted to go faster, do wheelie's and race. At 11 years old he did it on a new Yamaha 60 Mini Enduro. In 1971, on his very first day of racing, he won all of his 5 Heats. Joe then advanced to a Yamaha 125. At age 13, he lived in Florida and had a Full Roll Bar Dune Buggy. The first weekend he had the Dune Buggy, he raced it all weekend and blew up the engine. He then learned how to work on cars and replaced three engines during the time he had it. At age 18, he started racing at Santa Fe Race Track in Illinois. He won his first two races in a row in two weekends back in 1978 at age 18.

At Hernando High School in Florida he took every Mechanical coarse offered then moved back to Illinois in 1977 and took Basic and Advanced Machine Shop. He then knew he wanted to be a Mechanic or Machinist or both as it ended to be after Triton College in 1981.

After taken several Machine Shop Classes through National Tool and Die Institute of Washington DC, he was recruited through one of the members by a company named Commercial Machine Works. Commercial Machine Works was one of the largest companies in the United States that worked on all types and brands of Power House Equipment manufactured across the United States and out of the country. At the time Commercial Machine Works was an Authorized Service Shop for Elliott YR Steam Turbines, Blowers and Centrifugal PAP Compressors. He loved working as a mechanic on all of these types of equipment.

Later on he used his Machinist and Mechanical skills as a Field Machinist and Field Mechanic and traveled all over the country for over 20 years, working on every manufactured Turbine, Pump, Compressor, Gearbox, Blower and any other Power House related equipment there was to work on along the way.

In 2001, Joe Breseman decided to start his own company and named it B&G Rotating Equipment Service Company, Inc. Still to this day he enjoys being a hands on Mechanic/ Mechanist repairing the equipment to the best of his ability and is very proud of the work he has done when it leaves the shop. He is very meticulous with everything he does in his shop from Cleaning, Inspecting, Repairing, Quality Control to packaging up every job in the shop. This is the main reason he started his own business. He also wanted to be able to do the best job he could without a boss pushing him to take short cuts and sacrificing quality.

Till this day Joe still rides a motorcycle when he has that rare leisure time. His racing days are well missed and over but you may see him cruising the highways on a weekend riding one of his Harley's or Honda Gold Wing. He still loves both his work and motorcycles. Some things just don't change.

Joe Breseman and B&G Rotating Equipment Service Equipment Company, Inc. are very proud of their workmanship and they love to make their customers happy. It makes it very rewarding when their customers receive their parts and service and are completely happy and satisfied. Joe Breseman also would like to thank all of his customers for their business and support throughout the years.
